ENTERPRISE-GRADE

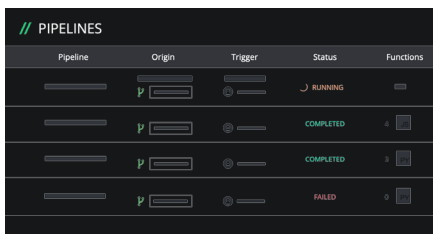

SOFTWARE DOCUMENTATION

Komment is a self-hosted solution for automating code documentation that plugs right into existing developer workflows on your enterprise infrastructure.

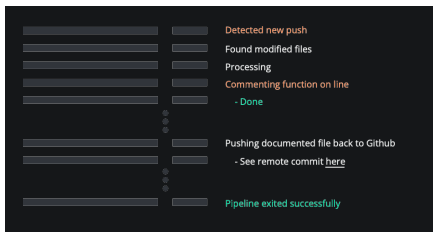

By enabling engineering teams to focus on innovation rather than explanation, Komment reduces documentation costs by over **95%** and delivers a solid **21x** ROI in increased developer productivity — all while adhering to the strictest standards of security and data privacy.

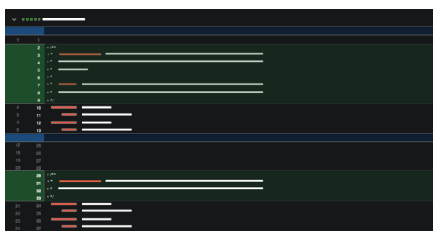

1. Securely connect projects to your private deployment of Komment.

2. Automatically triggered pipelines keep your docs synced with code changes.

3. Configure workflows to suit your dev processes from a single control panel.

4. Results saved as in-code comments and wiki pages for easy multi-modal access.

YOUR CODE NEVER LEAVES YOUR INFRASTRUCTURE

IRONCLAD SECURITY

100% privacy-centric architecture that resides entirely within your infrastructure. Zero third-party reliance. Zero code sharing. Zero risk of IP leaks.

UNPARALLELED PERFORMANCE

Purpose-built pipelines and proprietary algorithms that offer superior performance over generic models. Accurate, structured, sophisticated. All in one go.

CONTINUOUS SYNCHRONIZATION

Seamless DevOps integrations that generate docs on pre-configured events. Freshness without the effort. Never deal with divergent documentation again.

LEGACY CODE MANAGEMENT

Documentation workflows that are immune to staff changes. Comment assets even with the original developers away. Decisively derisk tech stacks.

Delivering a first-class documentation experience to the most innovative companies in the world
